## Workshop on Scientific Publishing

(2nd announcement)

The preparation of scientific papers is an essential part for all scholars who wish to successfully communicate their research. In order to provide clear and comprehensible guidelines on the manuscript preparation process, and to find out why some papers get accepted and others do not, the *Journal of Integrative Plant Biology* (JIPB) and *Peking University* will jointly hold a “**Workshop on Scientific Publishing**” at Peking University on September 6-8, 2010.

**Prof. William Lucas** from University of California (Davis), USA, will during his talks cover the *process of scientific writing, criteria in scientific publishing, the management of international top journals, and ethics in scientific research*.

In addition to these talks, **Dr. Mark Robertson** from Wiley-Blackwell Publishing Group will give a seminar on September 8 on *how to get your paper published from the publishers' viewpoint*, and **Prof. Dang-Sheng Li** from Cell Research will give a discourse on *how to write a good research paper*.

This workshop is mainly aimed at researchers, undergraduate and graduate students, and editorial staff of scientific journals, but others in the scientific publishing community are also welcome to benefit from the talks and discussions.
